

DE-ALU - AIRFOIL PROFILE ALUMINUM AXIAL FANS

ALUMINUM AIRFOIL PROFILE AXIAL FANS, DIAMETERS FROM 230 MM TO 804 MM

DIAM. 230 - 804 mm

CORNER 25°-50°

T -50° C to +180° C°

Airfoil profile axial fans for extreme working conditions

De-ALU aluminum fans are manufactured assembling fixed pitch, airfoil profile blades with a light aluminum alloy hub. De-ALU fans deliver the best performances in extreme temperature conditions and corrosive atmospheres. De-ALU impellers are configurable with 3/4/5/6/7/8/10/14 blades, both for clockwise and anticlockwise rotation and can produce a sucking or blowing air flow. Blades are available with right fixed-pitch setting angles ranging from 25° to 50°.
