

FANS FOR HOVERCRAFTS

Given their strength and reliability, HasconWing axial fans continue to be the right choice for propelling hovercrafts around the world.

Superior quality and unsurpassed performance levels given by our propellers have been acknowledged and appreciated by those people who are passionate about hovercrafts, and want to make sure they don't have to face mechanical problems during a race.

Our HasconWing **TM Series** (variable pitch axial fans) are conceived to deliver high airflows, and at the same time guarantee a strong balance of the propeller.

Call us now to order a new propeller with outstanding performance levels for your hovercraft. Our experienced sales and technical teams are always willing to assist you with our innovative solutions.
