

NEW HASCONWING TYPE 'DE-ALU' - ALUMINUM IMPELLERS FOR EXTREME WORKING CONDITIONS

THE IDEAL IMPELLERS FOR HIGH TEMPERATURES AND CORROSIVE ENVIRONMENTS

Rescaldina, 08/08/2022

New 'De-ALU' axial fans are the ideal choice for applications which require **high performance levels and low noise in extreme working conditions**. These impellers are excellent for heavy duty fans, compressors, engine cooling systems, ventilation of livestock and many more.

'De-ALU' fans are manufactured assembling fixed pitch, airfoil profile aluminum blades with a light aluminum alloy hub. 'De-ALU' impellers are configurable with 3/4/5/6/7/8/10/14 blades, both for clockwise and anticlockwise rotation and can produce a sucking or blowing air flow. Blades are available with right fixed-pitch setting angles ranging from 25° to 50°.
