

HASCONWING BLADES APPROVED BY FDA AND USP-NF

FORAFLOM POLYMER CERTIFIED AS SUITABLE FOR FOOD OR PHARMACEUTICAL AND MEDICAL DEVICES

Rescaldina, 20/03/2023

HW Ventilation is glad to announce that our **PVDF (Foraflo)** blades successfully passed the tests according to **USP-NF 2022 Issue 2 par 88 (Acute Systemic Toxicity Test Protocol)**.

PVDF (Foraflo) is a special polymer, which was selected by HW Ventilation for applications where the impellers might get in contact with **food** or **pharmaceutical** and **medical** devices.

In order to prevent potentially toxic contaminations, PVDF (Foraflo) is an FDA-approved material. HW Ventilation voluntarily decided to test PVDF (Foraflo) in accredited 3rd party laboratories and proved that the material is in compliance with the requirements of USP Plastic Class VI.

Customization is at the heart of what we do and we are always searching innovative materials to satisfy our customers' needs.
