

F - SICKLE PROFILE AXIAL FANS

PLASTIC SICKLE PROFILE AXIAL FANS, DIAMETERS FROM 300 MM TO 1102 MM

DIAM. 300 - 1102 mm

CORNER 25°-50°

T -40° C to +120° C°

Sickle profile axial fans with low noise signature

F plastic fans are manufactured assembling variable pitch, slightly sickle profile blades with a light aluminum alloy hub. The fans are the best choice to suit a variety of applications which require low noise signature and high efficiency at low rpm. The fans can have 3/4/5/6/8/9/12/16 blades configurations both for clockwise and anticlockwise rotation and can produce a sucking or blowing air flow. F blades are available with right or left fixed setting angles ranging from 25° to 50°.

Material

PPG

PAG

Description

Glass Reinforced Polypropylene (PP 30% glass)

Glass Reinforced Polyamide (PA6)
